INTRODUCTION

TMQ Dominicana, S.A., manufacturer and distributor of raw materials and chemical products for water treatment, mining and agriculture industries, among others.

We are the largest producers in the Caribbean of Sodium Hypochlorite, Sodium Bisulfite, Copper Sulfate and Zinc Sulfate, among others. We have a port facilities for reception of bulk ships in the East Port of Haina. We comply with all safety standards and have ISO 9001-2015 Certification. We distribute throughout the Dominican Republic through our own fleet of 36 vehicles, including 5,000-gallon tankers and 2,500-gallon trucks, platforms, isotanks and chassis.

Our highest quality goes hand in hand with the most experienced professionals in each of the industries we serve, our main objective is the satisfaction of our customers and partners.

Water Treatment

TMQ Products Catalog

BY INDUSTRY

The wastewater treatment process is fundamental in industries such as metallurgy, tannery, refinery, chemical industry, paper, and food industry, among others, to minimize the environmental impact of these industries.

Some of our products are:

Products	Description and Application	Product Family
ALUMINIUM SULPHATE 17%	Wastewater clarifying flocculant.	Water treatment
CAUSTIC SODA 50%	Used in the manufacture of industrial processes, soap, detergent, food, and textiles.	Disinfectant
CALCIUM HYPOCHLORITE 70%	Granulated chlorine for disinfection.	Disinfectant
CHLORINE GAS	Wastewater disinfection.	Disinfectant
HYDROCHLORIC ACID	As a PH reducer and for regeneration of ion exchange resins.	Disinfectant
HYDROCHLORIC ACID	Used in metal pickling, neutralizing in the chemical industry.	Neutralizer
NITRIC ACID	Chemical used to unclog irrigation systems.	Descaling
MICROBE-LIFT IND	Organic bacteria that return biodiversity to water.	Water Regenerator
MICROBE-LIFT SA	Organic bacteria that return biodiversity to water with Humic Acid.	Water Regenerator
PENTAHYDRATE COPPER SULPHATE 98%	Mineral micronutrient additive, anti-microbial, and fungicide catalyst.	Neutralizer
PHOSPHORIC ACID / FOOD GRADE	Acid used to unclog irrigation systems.	Descaling
SULFURIC ACID	Liquid chemical for steel treatment.	Descaling
SODIUM BISULFITE 38%	Removes chlorine content from water.	Neutralizer
SODIUM HYPOCHLORITE 10.5%	Liquid bleach for disinfection.	Disinfectant
SODIUM HYPOCHLORITE 6%	Liquid bleach for disinfection.	Disinfectant
TRICHLORISOCYANURIC ACID 90% GRANULAR	Granulated chlorine for disinfection.	Disinfectant
TRICHLORISOCYANURIC ACID 90% TABLET	Chlorine in tablets for disinfection.	Disinfectant

Agriculture

Fertilizers and soil regenerators are essential at all stages of crop growth.

Some of our products are:

Products	Description and Application	Product Family
BACTERIA MICROBE LIFT QUANTUM VSC	Organic bacteria with Humic Acid that return biodiversity to soils.	Soil regenerator
BACTERIA MICROBE LIFT QUANTUM LIGHT	Organic bacteria that return biodiversity to soils.	Soil regenerator
NITRIC ACID	Chemical used to unclog irrigation systems.	Descaling
PHOSPHORIC ACID / FOOD GRADE	Acid used to unclog irrigation systems.	Descaling
POTASSIUM NITRATE	Feed for crops with an important contribution of nitrogen and potassium.	Fertilizer
SULFURIC ACID	Liquid chemical for steel treatment.	Descaling
SOLUBLE POTASSIUM SULPHATE	Feed for crops with a potassium intake of 50%	Fertilizer
SODIUM HYPOCHLORITE 10.5% and 6%	Liquid bleach for disinfection.	Disinfectant

Mining

Mining have a relevant importance in our environment. Minerals are mined and processed to build almost everything we see around us. At TMQ we have effective chemical solutions for this industrial process.

Products	Description and Application	Product Family
SULFURIC ACID	Liquid chemical for steel treatment.	Descaling
CAUSTIC SODA 50%	Used in the manufacture of industrial processes, soap, detergent, food, and textiles.	Disinfectant
COPPER SULPHATE 15%	Float and mineral separator.	Mining
ZINC SULPHATE 30%	Float and mineral separator.	Mining

Metallurgy

In metallurgy, the extraction, processing, and treatment of metals and their alloys is carried out. It forms the basis of industrial development.

At TMQ we offer ideal chemicals for these processes.

Products	Description and Application	Product Family
CAUSTIC SODA 50%	Used in the manufacture of industrial processes, soap, detergent, food, and textiles.	Disinfectant
HYDROCHLORIC ACID	Used in metal pickling, neutralizing in chemical industry.	Neutralizer
NITRIC ACID	Chemical used to unclog irrigation systems.	Descaling
PHOSPHORIC ACID / FOOD GRADE	Acid used to unclog irrigation systems.	Descaling
SULFURIC ACID	Liquid chemical for steel treatment.	Descaling

Cleaning and Disinfection

Cleaning and disinfection are operations aimed at combating the prolixity and activity of microorganisms that can contaminate food, surfaces, and work areas in general. In TMQ we have raw materials for the manufacture of these cleaning products, such as disinfectants, soaps, chlorine, detergents, etc. We are leaders in the production of Sodium Hypochlorite (liquid bleach) and distribution of solid chlorines, as well used in swimming pools and water tanks.

Some of our products for this market are:

Products	Description and Application	Product Family
CALCIUM HYPOCHLORITE 70%	Granulated chlorine for disinfection.	Disinfectant
CAUSTIC SODA 50%	Used in manufacturing industrial processes, soap, detergent, food, and textiles.	Disinfectant
COPPER SULFATE 98% / PENTAHYDRATE	Mineral micronutrient additive and antimicrobial and fungicide catalyst.	Neutralizer
DICHLORISOCYANURIC ACID 60%	Used in water disinfection, in tanks or swimming pools.	Disinfectant
SODIUM HYPOCHLORITE 10.5% AND 6%	Liquid bleach for disinfection.	Disinfectant
TRICHLORISOCYANURIC ACID 90% GRANULAR	Granulated chlorine for disinfection.	Disinfectant
TRICHLORISOCYANURIC ACID 90% TABLET	Chlorine in tablets for disinfection.	Disinfectant

Textile

TMQ Products Catalog

BY INDUSTRY

In TMQ we offer chemical products for the textile industry, dedicated to the manufacture of threads, fibers, fabrics, and other materials to obtain derived products such as clothing.

Products	Description and Application	Product Family
LIQUID CAUSTIC SODA 50%	Used in the tissue treatment process known as mercerization.	Disinfectant
MICROBE-LIFT IND	Organic bacteria that return biodiversity to water.	Water Regenerator
MICROBE-LIFT SA	Organic bacteria that return biodiversity to water with Humic Acid.	Water Regenerator

Automotive Industry

TMQ Products Catalog

BY INDUSTRY

Products	Description and Application	Product Family
COOLANT	Engine cooling agent.	Soft drink
SULFURIC ACID	Manufacture of battery liquid.	Descaling
SODIUM HYPOCHLORITE 6%	Cleaning and disinfection of work areas.	Disinfectant

Animal Care

At TMQ we have made our way into the Animal Care industry with our raw materials and chemicals.

Products	Description and Application	Product Family
BACTERIUM MICROBE LIFT QUANTUM VSC	Organic bacteria with Humic Acid that return biodiversity to soils.	Soil regenerator
BACTERIUM MICROBE LIFT QUANTUM LIGHT	Organic bacteria that return biodiversity to soils.	Soil regenerator
MICROBE-LIFT IND	Organic bacteria that eliminate bad odors in pig or chicken farms.	Orgánicos
MICROBE-LIFT SA	Organic bacteria that return biodiversity to water with Humic Acid.	Water Regenerator
PENTAHYDRATE COPPER SULFATE 98%	Antimicrobial and additive used for improvement in growth and for correction of lack of copper in animals.	Neutralizer
PHOSPHORIC ACID / FOOD GRADE	It is used as a source of phosphorus and acidifier.	Descaling
TRICHLORISOCYANURIC ACID 90% TABLET	Sterilization of Drinking Water for farms.	Disinfectant

Foods

We have disinfection products with high performance and effectiveness.

Products	Description and Application	Product Family
CAUSTIC SODA 50%	Used in the manufacture of industrial food processes.	Disinfectant
PHOSPHORIC ACID / FOOD GRADE	It is used to neutralize Liquid Caustic Soda in oil refineries, in the pasteurization milk industry and in the soft drink industry.	Neutralizer
SODIUM HYPOCHLORITE 10.5%	Liquid bleach for disinfection.	Disinfectant
